

# Amit Sheen *resume*

Hi guys, nice to meet you!

I'm an experienced web developer, specializing in CSS, design systems, animations, and creative coding. I've been writing code since forever, and over the years I've taken part in creating dozens of advanced web/mobile applications from the ground up. I have an entrepreneurial mindset and a pathological curiosity about new technologies, a constant desire to learn new things, and I'm always ready for a new challenge.

I love what I do, and proud of it. I'm agile, versatile, learn fast, and work faster. I'm also a gadget freak, game maker, magic enthusiast, autodidact, a wannabe musician, and a former chef.

## Current State

Since mid-2023, I've been providing hand-on consulting services to early stage companies while intensively learning and growing professionally, joined the **W3C CSS-Next** community group to help educate developers on new features and methods, and created the **#CSScapism** YouTube channel as an outlet to explore and test new and creative frontend concepts.

## May 2022 - Jan 2023

Wix.com - Senior Frontend Developer

Member of the WOW team, responsible of the 'Wow factor' of the company's editor, like animations, transitions, advanced text effects, video effects, and more.

## Aug 2020 - May 2022

Payoneer - Senior Frontend Developer

Member of the core infrastructure team, developing and maintaining core services and shared components, and supporting their proper use throughout the company and the code base.

## Apr 2017 - Dec 2020

Freelance web developer & Tech consultant

During my time as a freelance, I have worked with various companies, helping them create better products. I built custom applications for startups like Tulu, Wis2Biz, and SmartBroker, developed web moduls for clients such as Ayalon, HomeDiet, and Bcount, and advised several ventures like LiveTrip, Rewizit, WeConn, Maaglim, and more.

## 2011 - 2017

I had various positions in several companies, mostly as a developer, but some of them also included market, product, and managerial elements. I learned, grew, became a better developer, and even started my own independent venture along the way.

## Ancient history

I completed my military service in 2002 as a first sergeant, got a degree in the Culinary Arts on behalf of the Ministry of Labor and functioned for several years as a cook/chef in a number of kitchens in the Tel Aviv area. after that, I had various sales positions and low/mid-level management roles in companies like Bezeq, AScom, Yellow Pages, and more.

## I am...

- ✓ A problem solver
- ✓ A professional
- ✓ A team player
- ✓ An autodidact

## I have...

- ✓ An initiative approach
- ✓ An uncompromising integrity
- ✓ Interpersonal skills
- ✓ Positive attitude

## I can do...

- ✓ Coding
- ✓ R&D
- ✓ DevRel
- ✓ UI/UX

## Community contribution:

I'm always happy for an opportunity to share my knowledge and experience with other developers, whether it's with a lecture, an article, or a creative CodePen. And I had the privilege of being a speaker at a large number of professional events, from local meetups to huge international conferences, and I got to be a guest speaker in many front-end related podcasts and online shows, and even more Twitch and YouTube channels.
